

**AMENDMENTS TO THE ABSTRACT**

Please amend the Abstract as set forth below in marked-up form.

The device for removing water\_drops ~~of from an~~ umbrella is constituted such that a number of water absorption members with elastic property are disposed at certain intervals radially in the inserting opening ~~of for an~~ umbrella of the device body, the inserting space for the umbrella is in the central part of a number of water absorption members, thereby a closed rainy umbrella is inserted into the inserting space ~~inserted~~, the umbrella cloth is inserted into the clearance between the each adjacent ~~each~~ water absorption member, then water\_drops on the umbrella cloth can be absorbed and removed by sliding the inserted umbrella in the direction of insertion of the umbrella, ~~said the~~ device does not need such energy as electric energy, and water absorption is performed certainly and within only short time. In the device foundation promotion system the server ~~who~~ which is connected ~~preferable~~ preferably to a network performs processing of device foundation owner recruitment and advertiser recruitment on the device with advertisement, processing of acceptance of proposal of device foundation owner and advertiser, and processing transmittance of information necessary for the real device manager and promotes foundation of the device for removing water\_drops effectively and spreads the device.
